### PROPOSED BARACK OBAMA STAMPS COULD SAVE USPS MEDIA MAIL

Current Phonograph owner Glen ugly Naughty is proposing that United States Postal Service print Barack Obama postage stamps depicting the former president holding vinyl records.

The company designed these postage stamp design-ideas with Runway, an AI program.

USPS Media Mail is an inexpensive mailing option offered by the postal service which is restricted to mailing physical media such as music cassette tapes, books, & vinyl records that many consumers enjoy.

Glen Naughty states “Current Phonograph sell books, audio tapes, & vinyl records via our website & nearly 100% of our orders ship via USPS Media Mail. A Forever stamp of Barack Obama holding vinyl records would help stimulate physical media consumption of vinyl records which is often sold mail order.”

Glen Naughty believes if United States Postal Service adopt these designs on their stamps, they could substantially increase their Media Mail revenue & billings.
